EC-Council
Building A Culture Of Security

C|CISO
Certified | Chief Information Security Officer

Empowering the Next Generation of Security Leaders

The Certified CISO (Certified Information Security Officer) is the only CISO training and certification program in the industry that goes beyond technical learning to create ethical cybersecurity professionals of the highest caliber and deliver critical executive leadership skills required by a CISO.
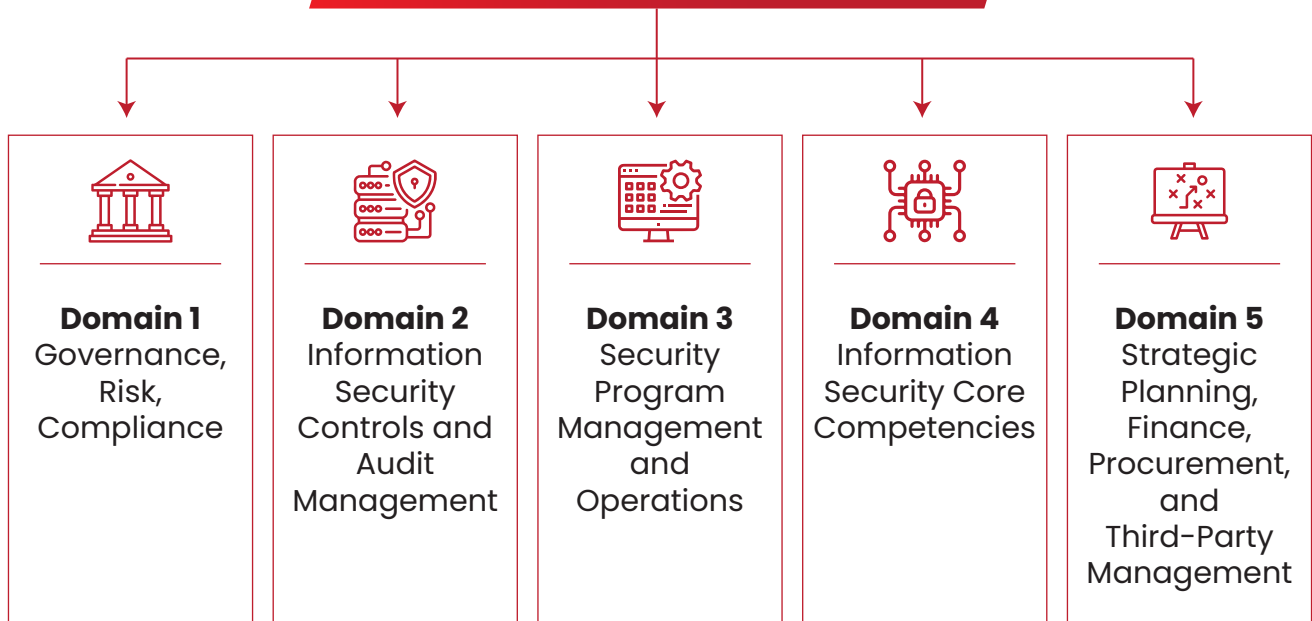

What You'll Learn

- Audit management, governance, IS controls, human capital management, strategic program development, and financial expertise
- Application of technical knowledge essential for an information security executive's day-to-day work.
- How to adapt to ever-changing business needs
- Tools to think beyond the traditional boundaries of security functions and think in terms of what the business needs, what the board wants, and what the investor demands

Why Choose the Certified CISO?

- A Comprehensive curriculum designed by practicing CISOs
- Bridges the gaps between technical, executive management, and financial functions
- Enables you to speak the business language that the board understands
- Gain industry experience essential for cybersecurity leaders
- ANSI/ISO/IEC 17024 accredited
- Recognized by:
